**JOB POSTING: Research Analyst I, 12 month contract**
Sunnybrook Health Sciences Centre:  
Ontario Breast Cancer Community Research Initiative

**Responsibilities**
- Assist in recruitment of participants (identify, screen, pre-test and administer questionnaires)  
- Communicate and correspond with physicians and researchers  
- Compile and prepare research applications for submission to funding agencies  
- Search and retrieve online publications; conduct literature searches  
- Perform data entry and maintenance of patient databases  
- Provide administrative support to the research team

**Qualifications**
- Bachelor of Science degree: Biology, Chemistry, Psychology, Health Sciences  
- One year experience in qualitative interview research studies or related research experience  
- Excellent written and oral communication skills  
- Experience and knowledge of database management, and use of analysis software applications (e.g., MEDLINE, PubMed, Nvivo, PsycINFO)  
- Ability to independently coordinate, prioritize and manage several projects  
- Ability to work as part of a team  
- Highly organized, energetic self-starter

**INFO. ON THE ORGANIZATION:** The Ontario Breast Cancer Community Research Initiative is designed to create knowledge about the social, psychological, emotional and physical aspects of living with breast cancer. The program focuses on community participation, research innovation and knowledge sharing. Our researchers are investigating issues and experiences important to women active in breast cancer groups and organizations and to women with breast cancer more generally—particularly the experiences of women who have not been well represented in research and programs. The OBC CRI is a partnership between: Sunnybrook Health Sciences Centre, Centre for Research in Women’s Health and the Canadian Breast Cancer Foundation, Ontario Chapter.

---
