## Skills developed in Anthropology

To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

**Cultural awareness & interpersonal:** sensitivity to cultural differences and diversity; work cooperatively with others; and understand group dynamics.

**Written & oral communication:** attention to detail; present and defend a position; summarize results; and present theories/ideas/viewpoints in a comprehensive manner.

**Technical:** preserve objects by selecting chemical treatment, temperature, humidity; and draw maps and construct models to scale; photograph sites, objects, people, occasions.

**Research & analysis:** carry out data collection and evaluate research results; and catalogue information.

## Get involved

Check out student organizations on campus. Here are a few:

## FUTURE STUDENTS

### Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The approximate average required for admission is low- to mid-80s. More information is available at [utm.utoronto.ca/viewbook](http://utm.utoronto.ca/viewbook).

**NOTE:** During the application process, applicants will select the Life Sciences admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

### Sneak Peek

How are archaeological data recovered through excavation? Learn how archaeological data are organized and analyzed and what archaeological data tell us about the human past. What is the connection between health and anthropology? Experience how medical anthropologists conduct their fieldwork by testing growth and development, diet, and activity lab methods.

UTM Anthropology has two new teaching laboratory spaces with a large collection of archaeological artifacts, fossils and human skeletons. Learn human skeletal anatomy; examine fossil casts close up; or work with archaeological artifacts with a small group of peers, your TA and the instructor.
