LINGUISTICS

Skills developed in Linguistics

To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

Technical: knowledge of language use and language faculty; understanding of how humans process and produce language; and understanding of language variation and change.

Research: conduct hands-on study of linguistic data related to theoretical and experimental linguistics; apply methodologies from many disciplines; and detail-oriented.

Analytical: analyze and interpret various kinds of quantitative and qualitative information as well as critical thinking.

Communication & interpersonal: proficiency in critical reading and writing and oral expression; knowledge of how language is used in social contexts; knowledge of the structure of at least one other language besides English.

FUTURE STUDENTS

Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The approximate average required for admission is mid- to high-70s. More information is available at utm.utoronto.ca/viewbook.

NOTE: During the application process, applicants will select the Humanities admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

Sneak Peek

Investigate phonetics in LIN228H5! You'll discover what sounds are most commonly used in languages and learn to recognize and produce them. Curious about sociolinguistics? Take LIN256H5 and get introduced! You'll study the social implications of linguistic variation.

Undergraduate linguistics is an essential component of a liberal education because any academic discipline that considers human nature -- anthropology, communication, literature, language studies, neuroscience, philosophy, psychology, teaching and learning, among others -- must have something to say about the nature of language, how it works, and how it is used.
