Sociology is the systematic study of the social world. Sociologists focus on: health and disability; global inequality; social class; sexuality and gender; race and ethnicity; culture; education; crime and deviance; immigration; and power and politics.

Our teaching and research expertise covers diverse topics central to understanding and explaining the state of society and social change. Students develop critical thinking, writing, and numeracy skills and learn how to analyze, understand and address real life issues all in preparation for further education and employment.
