

**Peter M. Kotanen**  
**Short Curriculum Vitae**

**BIOGRAPHICAL INFORMATION**

**Date of Birth:** January 17, 1961

**Citizenship:** Canadian

**University Address**

Department of Biology  
(Department of Ecology and Evolutionary Biology)  
University of Toronto Mississauga  
3359 Mississauga Road North  
Mississauga, Ontario Canada L5L 1C6

Office: 905-828-5365  
Lab: 905-828-5304  
FAX: 905-828-3792  
e-mail: peter.kotanen@utoronto.ca  
http: www.utm.utoronto.ca/~w3pkota/

**Research Interests:** I study ecological interactions between plants and their natural enemies (herbivores and pathogens). My recent research has centred on the effects of natural enemies on non-native species; ongoing projects focus on the question of whether escape from natural enemies promotes the survival and spread of exotic plants, and whether escape from enemies is more likely in marginal populations. Other recent research has included studies of seed ecology and of the effects of grazing by northern goose populations.

**Degrees**

***Ph.D.*** (Ecology) (1994) University of California, Berkeley, Department of Zoology; Supervisor: W.P. Sousa  
Thesis title: Revegetation of meadows disturbed by feral pigs in Mendocino County, California.

***M.Sc.*** (Ecology) (1987) University of Toronto, Department of Botany; Supervisor: R.L. Jefferies.  
Thesis title: A comparison of the growth responses of three sedges to foraging by Lesser Snow Geese.

***B.Sc.*** (Honours) (1985) University of Toronto (Trinity College)  
Specialist in Botany and Zoology

**Employment**

2018 - Professor, Department of Biology, University of Toronto Mississauga  
2001 - 2018 Associate Professor, Department of Biology, University of Toronto Mississauga  
1996 - 2001 Assistant Professor, Department of Botany, University of Toronto Mississauga  
1994 - 1996 Postdoctoral Research Associate, Department of Ecology and Evolution, University of Chicago

**Professional Activities and Impacts**

**Editorial positions**

2008 - present: Associate Editor, Ecology / Ecological Monographs (Ecological Society of America)  
2001 - present: Associate Editor (Ecology), Botany (NRC Press)  
2005 - 2008: Associate Editor, Acta Oecologica (Elsevier)

**Memberships**

Centre for Urban Environments, University of Toronto  
Centre for Global Change Science, University of Toronto  
Canadian Society for Ecology and Evolution  
Brodie Club

### Visiting professorships

2007: Key Arid Grassland Ecology Lab (Lanzhou University, China).

2003: Laboratoire d'Ecologie, Systématique et Evolution, University of Paris XI (Orsay).

### Field Sites and Expeditions (research, teaching, and collecting)

2010	Southampton Island, Nunavut
2009	Namaqualand, South Africa
2009	Costa Rica
2007	Tibetan Plateau, Gansu Province, China
2003	Various locations, France and England
2001	Polar Bear Provincial Park and Hudson Bay Coast, Ontario
1998-2008	Akimiski Island, Nunavut
1997	Bylot Island, Nunavut
1997-present	Koffler Scientific Reserve, Ontario
1995-1996	Shortgrass Steppe LTER, Colorado
1993	Mountain Lake, Virginia, USA
1991	Barro Colorado Island and Goleta Marine Lab, Panamá
1990-1993, 2000	Angelo Reserve, Mendocino Country, California
1987-1990	Bodega Marine Lab, California
1985	Keewatin District, Nunavut
1984-present	Churchill and La Pérouse Bay, Manitoba
1980-present	Algonquin Park, Ontario

### The Koffler Scientific Reserve at Jokers Hill

The Koffler Scientific Reserve at Jokers Hill (KSR) is a 350 ha research station near Newmarket, Ontario. It was donated to the University in 1995, and since has become the University's major ecological research station. This site has supported research by scores of faculty and their students from around world, including Canada, Australia, China, the Czech Republic, France, and the USA, resulting in more than 180 refereed publications (as of 2017). This site is also used extensively for undergraduate teaching, has housing and modern lab facilities, and has remarkable conservation value. Much more information may be found at <http://ksr.utoronto.ca>. I have worked at this site continuously since 1997, have served as chair of the Scientific Oversight Committee, and am currently a member. Most of my students have conducted research at this site, and my lab group compiled the KSR species lists, totalling more than 800 plant and animal taxa.

### C. SCHOLARLY AND PROFESSIONAL WORK (supervised students in **bold** font)

---

#### **Summary** (citation statistics: Google Scholar; ORCID ID: [orcid.org/0000-0002-7842-8715](http://orcid.org/0000-0002-7842-8715))

---

Peer-reviewed papers	51
Invited lectures	42
Other lectures and posters	88
Citations	3353

 BankIt1641569 UOFTL004-11.COI-5P KF297839 (2013) (*Eupsilia morrisoni*)
- 4) North American Bird Banding Program: >2000 bands on passerines (Long Point ON, Prince Edward Point ON, Toronto Islands ON), Snow and Canada Geese (La Pérouse Bay MB, Akimiski Island NU)
- 5) Ontario Breeding Bird Atlas: contributor for first and second atlas (1981-1985 and 2001-2005)
- 6) Christmas Bird Count Participant: primarily Algonquin Park (1980-present)
- 7) Herbarium specimen donations: numerous vascular plant accessions (APM, TRT, TRTE)

## Symposia Organized

- 2017 Co-organizer (with Pedro Antunes), Accounting for soil biota feedbacks in invasive plant management. Symposium at the 14th International Conference on the Ecology and Management of Alien Plant Invasions, Lisbon, Portugal.
- 2014 Lead organizer, Terrestrial Invasive Plant Species II (TIPS II). U. of Toronto at Mississauga, ON.
- 2007 Session chair, Colonization versus invasion: do the same traits matter: international workshop, Ascona, Switzerland (sponsored by University of Zurich / ETH Zurich).
- 1997 Lead organizer, 1997 Ontario Plant-Herbivore Workshop. University of Toronto at Mississauga, ON.

## TEACHING AND SUPERVISION

### Courses Currently Taught (course descriptions adapted from the University course calendar)

**BIO 330S Plant Ecology:** A survey of the population and community ecology of plants. Topics include resource acquisition, growth and reproduction, mutualisms, competition, defence, invasions, disturbance, population dynamics, and community structure. Interactions with other plants, diseases, and animals particularly are emphasized.

**BIO 481Y Biology Research Project** (co-ordinator): Students in this course will conduct a research project under the supervision of a faculty member in the Department of Biology. The course is open to third and fourth year students. Students learn how to design, carry out, and evaluate the results of a research project. Students are required to write and present a research proposal, write a term paper, and present a seminar on the results of their research project.

### List of Graduate Students

- 1) Jason **Verbeek** (M.Sc. 2017)
  - Thesis title: Shared enemies and the competitive ability of native plants in populations of an invasive plant (*Cirsium arvense*)
  - Current position: Recent graduate
- 2) Krystal **Nunes** (Ph.D. 2017)
  - Thesis title: Impacts of aboveground and belowground interactions on the performance of an invasive thistle, *Cirsium arvense*
  - Current position: Instructor, University of Toronto and Humber College.
- 3) Colin **Cassin** (M.Sc. 2015)
  - Thesis title: The importance of invasive earthworms as seed predators of common forest flora of Ontario
  - Current position: Invasive Species Project Liaison for the Ontario Invasive Plant Council.
- 4) Yoonsoo **Lee** (M.Sc. 2013)
  - Thesis title: Sources of Spatial variation in herbivory and performance of an invasive non-native plant, Common Burdock (*Arctium minus*)
  - Current position: Program Instructor at Downsview Park, Toronto.
- 5) Dasvinder **Kambo** (M.Sc. 2012)
  - Thesis title: Differences in performance and herbivory along a latitudinal gradient for common burdock (*Arctium minus*)
  - Current position: Completed a Ph.D. with Ryan Danby at Queen's University.
- 6) Steven **Hill** (Ph.D. 2009)
  - Thesis title: Biotic resistance to non-indigenous plants: are phylogenetically novel invaders more likely to escape enemies?
  - Current position: Director, Dougan & Associates (environmental assessment).
- 7) Andrew **MacDonald** (M.Sc. 2009)
  - Thesis title: The effects of biotic interactions on *Ambrosia artemisiifolia* L.
  - Current position: Completed a Ph.D. with Diane Srivastava at the University of British Columbia; now a postdoc in the same lab.

- 8) James **MacKay** (M.Sc. 2008)
  - Thesis title: Local escape of Common Ragweed (*Ambrosia artemisiifolia*) from above- and below-ground natural enemies.
  - Current position: City of London Ontario's Ecologist.
- 9) Pamela **O** (M.Sc. 2003) (Primary supervisor; co-supervised with K.F. Abraham of the Ontario Ministry of Natural Resources)
  - Thesis title: Responses of *Festuca rubra* to natural and simulated foraging by geese on Akimiski Island, Nunavut Territory.
  - Current position: Completed a Ph.D. with Greg Henry, Department of Geography, University of British Columbia.
- 10) Deborah **O'Hanlon-Manners** (M.Sc. 2002)
  - Thesis title: The influence of habitat type on losses of tree seeds to fungal pathogens.
  - Current position: Working for the Department of Chemistry, University of Bristol.
- 11) Jennie **McLaren** (M.Sc. 2002) (Co-supervisor; Primary supervisor: R.L. Jefferies)
  - Thesis title: Vegetation mosaics, patch dynamics and alternate stable states in an Arctic intertidal marsh.
  - Current position: Assistant Professor at the University of Texas at El Paso.
- 12) Michelle **Schafer** (M.Sc. 2001)
  - Thesis title: Effects of fungal pathogens on seeds of grasses from meadow habitats.
  - Current position: Technician at Ontario's Centre of Forensic Sciences.
- 13) Sean **Blaney** (M.Sc. 1999)
  - Thesis title: Seed bank dynamics of native and exotic plants in open uplands of southern Ontario.
  - Also compiled the species lists (> 800 plants, birds, 30 mammals, herpetiles) for the Koffler Scientific Reserve (<http://ksr.utoronto.ca/SpeciesList>)
  - Current position: Executive Director of the Atlantic Canada Conservation Data Centre (<http://www.accdc.com>)
