FURTHER EDUCATION
The study of anthropology is unique in its incorporation of biological science and social science to pursue a deeper understanding of human existence. In an increasingly technological and global world, having human-centred scientific and cultural knowledge can complement almost any career or further education paths that you choose to pursue.

COURSE OPTIONS AND FLEXIBILITY
You can choose to focus your upper-year courses in a specific subfield of anthropology if you wish to pursue graduate studies or a career in a specific area. You can pursue generalist anthropology for a broad grounding in the various subfields and maximum career flexibility.

Anthropology subfields:
• Archaeology
• Biological Anthropology
• Forensic Anthropology
• Anthropology of Health
• Linguistic Anthropology
• Sociocultural Anthropology
