Safety in Residence during Summer and Notification of Incident

Campus Safety would like to notify summer residents of an incident that occurred Saturday, May 14, 2022. It was reported to Campus Safety that an unknown individual was outside of a student residence after dark, potentially looking into the residence suite. As summer weather approaches and we encounter more people who are not formally affiliated with UTM coming onto campus day and night, please follow these safety recommendations.

- Always lock your door and close and latch your windows overnight, and when you are away from your residence during the daytime. Assure that your roommates will do so as well.
- Draw your blinds to protect your privacy, especially from sunset to sunrise when it's darkest outside.
- Report any suspicious activity, such as loitering outdoors or peering into windows from outside, to campus police in the UTM Safety Services office.
- If you are in a townhouse, keep your motion-sensing or dusk-to-dawn light operable.
- If you have any residence maintenance concerns, such as broken blinds, outdoor lights that don't sense motion or don't turn on at sunset, locks or latches not working properly, etc., submit a service request to the Residence Services Desk so that the concern can be addressed quickly.
