

2023-24

GGR379

APPLY BY: MAY 31

5 DAYS
FIELD CAMP!
43.5641°N, 79.6765°W

Field Methods in Physical Geography

What is GGR379 all about? Experience unspoiled wilderness, lakes, wetlands and contribute to ongoing research @ Riverwood Park in Mississauga. Your group will design, plan and carry out a research project in water quality, hydrology, soil science, forest ecology, dendrochronology or another physical discipline. Take this course if you are considering graduate school, an undergraduate thesis or you just want to gain field experience and put your knowledge to practice. **GGR379 is an unforgettable experience!**

You will complete most of your work before the Fall Term even starts, ensuring a more relaxed pace to your Fall semester.

I want to go! How do I apply? You must have completed at least 8.0 credits, with at least 4.0 of these credits coming from the sciences (ANT, BIO, GGR, ENV, ERS, CHM, PHY, etc.) OR have permission of the course instructor (Dr. Trevor Porter). **Ancillary fees will be capped at \$125.** Download the registration form from our departmental website or contact Sabrina Ferrari for more details.

FIELD DATES: August 28-September 1 @ Riverwood Park in Mississauga

QUESTIONS? CONTACT SABRINA FERRARI, ACADEMIC COUNSELOR (SABRINA.FERRARI@UTORONTO.CA) OR PROF. TREVOR PORTER, GGR379 INSTRUCTOR (TREVOR.PORTER@UTORONTO.CA)
