### Program #11 ERMIN1666 Geography (Arts)

**Rationale for change:** This minor change improves the Human Geography minor program, and brings the requirements commensurate in line with those of other minor programs that require 4.0 credits from the cognate discipline. The previous requirement of 1.0 from any Social Science at the first year level was found not to adequately prepare students in the minor program, and may have prevented students from taking a sufficiently integrated and complementary mix of upper-year geography courses toward the minor requirements. The change fixes these issues.

**Before:**

**First Year 1.0 credit from ANY Social Science first year course.**  
**Second, Third and Fourth Year 3.0** credits from the list of GGR Social Science courses, as described in the Geography Course Descriptions section of this calendar, including at least 1.0 credit at the 300/400 **level.**

## Course #1 GGR117Y5 Where on Earth?

**Rationale:** Where on Earth? currently is taught as a full year course with a 1.0 FCE. The course provides an introduction to physical and human geography and, although taught as a full course, the human and physical geography components are taught in separate terms. Each section of the course has an individual evaluation scheme and a different instructor. There is a common final examination, but it is more heavily weighted to human geography to ensure equal allocation of the course grade between the two sections of the course. For the academic year 2012/13, we propose splitting the course into two separate half courses each with an O.5 FCE with one course devoted exclusively to human geography and the other to physical geography. Each course would have twenty-four hours of lectures and twelve hours of tutorial/practicals.

---

## Course #2 POL332Y5 Courts, Law and Politics in Comparative Perspective

**Rationale:** This course has not been taught in several years and there is no prospect that it will be taught again in the foreseeable future as the faculty member who taught this specialized course has retired.

---

## Course #3 POL362H5 Colonialism/Post Colonialism: Decolonizing Political Science

**Rationale:** This course has not been taught in several years and there is no prospect that it will be taught again in the foreseeable future as the faculty member has resigned.

---

## Course #4 POL363H5 The Colonial State and its Forms of Power

**Rationale:** This course has not been taught in several years and there is no prospect that it will be taught again in the foreseeable future as the faculty member has resigned.

---

## Course #5 SOC332H5 Race and Ethnicity I

**Rationale:** We propose to replace this course with a second year course. We need a race and ethnicity course at a more introductory level.

---

## Course #6 SOC337H5 Canadian Social Trends

**Rationale:** This course was established as the special interest of a faculty member who has since retired. It is not central to any program and is unlikely to be offered in the foreseeable future.

---

## Course #7 SOC338H5 Global Labour

**Rationale:** This course was established as the special interest of a faculty member who has since retired. It is not central to any program and is unlikely to be offered in the foreseeable future.

---

## Course #8 SOC348H5 Sociology of Development

**Rationale:** This course was established as the special interest of a faculty member who has since retired. It is not central to any program and is unlikely to be offered in the foreseeable future.

---

## Course #9 SOC351H5 Quantitative Analysis II

**Rationale:** This course has not been required for Sociology Specialists since 2006. It is not central to any program, and is unlikely to be offered in the foreseeable future.

---

## Course #10 SOC353H5 Globalization in Historical Perspective

**Rationale:** This course was established as the special interest of a faculty member who has since retired. It is not central to any program and is unlikely to be offered in the foreseeable future.

---

## Course #11 SOC365H5 Gender Relations

**Rationale:** There is a large demand for gender courses in sociology. To accommodate this demand, we propose to replace this single third year course with a larger second year and two different third year courses.

---

### **Course #12 SOC368H5 Sociology of Sex and Sexuality**

**Rationale:** The focus of this course exclusively on sexuality reflected the expertise of a faculty member that has now retired. The topic of sexuality and its relationship with gender will be covered at an introductory level by a new proposed course (Sociology of Gender) and at a more advanced level by a new proposed course (Gendered Identities).

---

### **Course #13 SOC388H5 Qualitative Analysis II**

**Rationale:** This course has not been required for Sociology Specialists since 2006. It is not central to any program, and is unlikely to be offered in the foreseeable future.

---

### **Course #14 SOC430H5 Social Surveys Using the Internet**

**Rationale:** This course was established as the special interest of a faculty member who has since retired. It is not central to any program and is unlikely to be offered in the foreseeable future.

# Courses - Description Changes

## Course #1 ANT316H5 South Asian Archaeology

**Before:** *Survey of* the archaeology of *prehistoric and historic* South *Asia*, using a comparative *framework* to *show how social* and *cultural developments* in *this* region *are similar to* and *different* from *developments in other world regions*. [24L]

**After:** *This course surveys* the archaeology of South *Asia (modern-day India, Pakistan, Sri Lanka and northern regions)* from the *Palaeolithic to the Medieval Period (+200,000 ya to ca. 1600 CE/AD)* using a comparative *framework*. *South Asia is a place where many external cultural traditions mixed with indigenous traditions to create new socioeconomic and sociopolitical entities and sequences. While we will examine classic examples of hunter-gatherer groups, early villages, urban settlements, regional polities, and large empires through time, we will also stress the contemporaneity of groups of people with very different lifestyles hunter-gatherers participated in trading networks with town and city dwellers, pastoral nomads moved through settled village regions during their annual migrations. The impact of archaeological research on the region today is seen through the politicization of South Asian prehistory and history that has strongly affected both interpretations of the past and modern political events. Cases such as the debate over the identity of the Harappans and the existence of the Aryans will be evaluated from both an archaeological and a political perspective.*

**Rationale:** Updating course description to reflect changes to course content and approach; course has not been taught for nearly 5 years.

---

## Course #2 ANT358H5 Doing Anthropology: Field Methods in Sociocultural and Linguistic Anthropology

**Before:** *Recommended* for those who *may specialize* in *Anthropology*. *Oriented around student projects; covers multiple aspects of field and research methodology (problem design, interviewing, record-keeping, etc.)*. [24L]

**After:** *This course investigates how sociocultural and/or linguistic anthropologists collect data, conduct fieldwork, and interpret research results. Students complement reading and lectures on method with gaining first-hand experience in carrying out various techniques of anthropological research including interviewing, collecting life histories, participant observation, and project design. Students formulate and complete a research project loosely organized around an annual theme. This course is designed for those students who want to gain skills in research design and practice as well as for those who are thinking about graduate-level work in anthropology or another social science program.*

**Rationale:** The old course description did very little to communicate the course content, rationale or its promise to students. The current description does so more effectively.

---

## Course #3 ANT461H5 Advanced Seminar in Sociocultural and Linguistic Anthropology

**Before:** This *course offers 4th year* anthropology *students the opportunity to explore*

*recent topics* in *socio-cultural* anthropology. *As the course will be taught on a rotating basis by different faculty, its contents will change and might range from the exploration of ethics, affect, and hope as recent objects of anthropological inquiry, to the investigation of place-making, spatiality, temporality, and the publics to the analysis of neoliberalism, secularism, and the anthropology of the state and citizenship. [24L]*

**After:** This *fourth-year seminar is designed for anthropology majors and specialists with an interest in sociocultural and linguistic anthropology. While seminar themes will vary, the aim is to provide a forum in which advanced students interested in graduate school can discuss cutting edge topics in the discipline.*

**Rationale:** This is an existing course that we are retooling to capture some of the best students who are thinking of attending graduate school.

---

#### Course #4 ANT461H5 Advanced Seminar in Sociocultural and Linguistic Anthropology

**Before:**

**After:** *This seminar has competitive entry, and is capped at 20. Interested students must apply directly to the department.*

**Rationale:** This is an existing course that we are retooling to capture some of the best students who are thinking of attending graduate school.

---

#### Course #5 ECO436H5 Measuring Well Being

**Before:** *This course covers a special topic in Economics. Content relates to instructor's area of interest, thus the course varies in focus from year to year. Students require specific prerequisites for each course. Details are available from the student advisor or departmental web site. [48L]*

**After:** *The course concerns itself with measuring societal economic well being. The historical development of the subject is considered together with the conceptual issues (and objections) associated with representing the welfare of economic agents. Different notions of welfare (Poverty, Inequality, Polarization, Equality of Opportunity) and the various empirical techniques for examining them are critically explored and applied using existing datasets.*

**Rationale:** Detailed course description with prerequisites required for calendar. Last year it was advertised as Special Topics course with limited course description in calendar.

**After:** Through a part-time, unpaid work placement, students apply the environmental expertise gained through previous course work. ### Course #8 GGR389H5 Field Studies in Human Geography

**Before:** **Description** and **interpretation of changing** cultural **landscapes, based on extended** field observation and **interviews in the Credit River valley or other local areas.** The **place of documentary evidence in fieldwork [36P]**

**After:** **This course will provide students with a first-hand exposure to the social, urban, historical and cultural geography of a North American city. During a 5-7 day stay in a city, students will apply basic field methods, such as observation and field note taking, to gain an in-depth understanding of the landscape and build environment. Students will participate in collecting primary observational data as well as gathering information gleaned from guided tours, lectures and group discussion. Prerequisite: 3rd-year standing in GGR (Arts) Specialist Program or ENV Specialist Management or permission of the Instructor, plus application and interview. Admission to course will be through application due by March 15. The student's application must be submitted to Sabrina Ferrari and must include a current transcript, a current curriculum vita, and a letter of application explaining why their qualifications and interest make them suitable candidates for this field course opportunity. Applicants who meet minimum criteria will be selected for an interview. Acceptance will be based on a combination of GPA, experience, qualifications and interview performance. There is a nonrefundable fee associated with this course of \$X, beyond summer tuition for the course, for which the accepted students are responsible.**

**Rationale:** Change in course description reflects broader interests of currently faculty to extend field course opportunities beyond the local area. It also creates opportunity for rotating instructors. The prerequisites ensure that the course is open only to students in Geography/Environment programs who have the required experience, skills, knowledge and maturity. The revised admission criteria and process reflects the success we have had with ENV332 in admitting high quality students.

---

## Course #9 CTE250H5 Communication and Conflict Resolution

**Before:** Prerequisite: **CTE100 and CTE200**

**After:** Prerequisite:

**Rationale:** Removed: CTE100 and 200 as prerequisites for CTE250.

Rationale: A pre-requisite was added last year in error. CTE100 and 200 do not need to be prerequisites for CTE250. Those who enter CTEP as second year entry students are required to take CTE100, 200, and 250 all in the same year in order to catch up. CTE200 and 250 are to be taken in Year 2 of study. CTE250 is now being offered in the Fall term and CTE200 in the Winter, which would further complicate the issue if CTE200 were to be a prerequisite.

## Course #22 GGR288H5 World Fresh Water Resources

**Before:** Prerequisite: **GGR117Y5/ENV100Y5/4.0** credits **Course** Exclusion: **GGR334H5**

**After:** Prerequisite: **GGR112H5/ENV100Y5/4.0** credits  
**Course** Exclusion: **cannot take GGR288H5 + GGR348H5 simultaneously**

**Rationale:** The material in GGR 348 (The Great Lakes- A Sustainable Resource?) builds on a foundation laid in GGR 288 (World Freshwater Resources). Information on the scarcity of freshwater, pollution, surface and groundwater quantity and quality and management approaches to freshwater are all essential to understand before taking GGR 348. The Great Lakes course explores many of these issues as a case study, and the student must have a sound understanding of the science behind any particular issue.

### Course #23 MAT133Y5 Calculus and Linear Algebra for Commerce

**After:** Prerequisite: Minimum 70% in Grade 12 Advanced Functions (**MHF4U**). **Highly Recommended: Minimum** 70% in Grade 12 Calculus and Vectors (**MCV4U**).

**Rationale:** These requirements, which are the same as those of MAT134Y and MAT135Y, provide sufficient preparation for MAT133Y. MAT233H5 was introduced a few years ago as a bridging course that enables students who took MAT133Y5 to continue to upper level courses in mathematics.

---

### Course #24 MGM200H5 Analysis for Decision and Control

**Before:** Prerequisite: MGM(101H5, **102H5**)/**100Y5** **Corequisite:**

**After:** Prerequisite: MGM(101H5, **102H5**)  
**Corequisite: STA218H5**

**Rationale:** MGM100Y was last offered in 1999.

Together with MGM200H5, STA218H5 provides an important quantitative foundation for the Management Specialist and Major programs, so we need to ensure that students take it at the beginning of their programs. Currently, because it is simply listed as a program requirement, it is too often postponed until students' third or fourth years, by which time its value to other courses is lost.

---

### Course #25 MGM221H5 Accounting Fundamentals I

**Before:** Prerequisite: MGM(101H5, **102H5**)/**100Y5**

**After:** Prerequisite: MGM(101H5, **102H5**), **MGM221H5**/MGT120H5

**Rationale:** MGM100Y5 and MGT100Y5 were last offered in 1999, replaced by MGM101H5 and 102H5 and it's time to remove them from the Calendar.

MGT120H5 is an exclusion to MGM221H5 and it can count as a prerequisite.

---

### Course #27 MGM230H5 Finance

**Before:** Prerequisite: MGM(101H5, **102H5**)/**100Y5**/MGM200H5

**After:** Prerequisite: MGM(101H5, **102H5**), MGM200H5

**Rationale:** MGM100Y and MGT100Y were last offered in 1999.

---

## Course #29 MGT120H5 Financial Accounting I
