The Institute for Management and Innovation at the University of Toronto is home to 6 professional-stream graduate programs that are interdisciplinary in nature. Blending business, natural sciences, and social sciences together ensures that our students graduate with a comprehensive understanding of innovation and leadership. We train cross-disciplinary problem solvers who are well positioned to work in traditional and emerging industries across all functions.

The Institute’s professional programs, listed below, include significant professional development training and industry programming as well as traditional academic teaching and research. Our approach ensures that students graduate with not just work experience but that they are ready and well-equipped with real-world experience and skills to bring to the workforce.

**IMI PROGRAMS**

- Master of Science in Sustainability Management (MScSM)
- Master of Management of Innovation (MMI)
- Master of Biotechnology (MBiotech)

**SUMMER 2020 INTERNSHIP / CO-OP PLACEMENTS**

MScSM and MMI students are available for placements with host organizations starting in May.

**THE MMI PROGRAM**

Designed for students with a background in science, engineering or technology, the Master of Management of Innovation program was developed in consultation with industry leaders, government and researchers studying management disciplines. This accelerated 12-month degree is a complements technical, lab and research training with core management courses including finance, marketing, strategy and big data analysis.

MMI students work across all sectors including healthcare, technology, finance, retail and more. They are interested in a variety of functional areas including operations, business development, market analysis, sales, consulting, data analytics and marketing.

**THE MScSM PROGRAM**

A two-year Program focusing on the interdisciplinary nature of sustainability, our students learn that sustainability means tackling business and economic growth while balancing environmental impact and ensuring community growth and health at the same time.

MScSM students have academic backgrounds in business, policy, environmental science, psychology, human resources, marketing, philosophy and beyond. Students work in the corporate sector with Fortune 500 companies, small and medium sized enterprises, start-ups, non-profit as well as in all three levels of government and education. Sample roles or areas of focus might include: strategy, sustainability (waste, energy, operations, community engagement, CSR, reporting, etc.), employee engagement, research, marketing/communications, policy, supply chain or government relations.

**STUDENT VIEWBOOKS**

Both the MMI and MScSM Programs have Viewbooks available for you to review.

Viewbooks include student profiles and additional internship information. Click the link below to review each Viewbook.

- MScSM Class 2021 Viewbook
- MMI Class 2020 Viewbook

**PLACEMENT CRITERIA**

In both programs, student placements must:

- Be 10–16 weeks in length, between May and August (approximately)*
- Be comprised of graduate-level work and cannot be entirely of an administrative nature
- Have a suitable supervisor or mentor to oversee the student’s work and complete their evaluation forms
- Be paid**

*MScSM students may be available for longer-term placements or permanent roles as they graduate immediately following the placement term.

**Most positions are paid, with an average range of $18-25/hr. Employers can claim the Ontario Co-Operative Tax Credit for hiring a student from either program. Unpaid placements are possible, but on a case by case basis. Please contact the Placement Managers for more details.

**TO HIRE AN INTERN OR CO-OP STUDENT**

The Placement Managers will work with you directly to ensure a suitable fit between student candidates and your required position.

We will assist with helping triage applicants (i.e., helping guide who might be a good fit for a given host employer), help facilitate interviews, and check on the student’s progress throughout the placement.

Our internships are much more than a summer placement—we want both the host employer and the student to have a meaningful and fruitful partnership and we do our very best to make good matches in this regard.
