Description

Algonquin Power & Utilities Corp is a North American diversified generation, transmission and distribution utility with $10+ billion of total assets. (APUC) delivers continuing growth through an expanding pipeline of renewable energy development projects, organic growth within its regulated distribution and transmission businesses, and the pursuit of accretive acquisitions.

The distribution business group (Liberty Utilities) provides rate-regulated water, electricity and natural gas utility services to over 750,000+ customers in the United States. The transmission business group invests in rate regulated electric transmission and natural gas pipeline systems in the United States and Canada.

The generation business group (Liberty Power, formerly known as Algonquin Power) owns a portfolio of regulated and long term contracted North American based wind, solar, hydroelectric and thermal powered generating facilities representing more than 1.5+ GW of installed capacity.

Our vision is to be the utility company most admired by customers, communities and investors for our people, passion and performance.

Mandate: This role will support the renewable power generation industry market research and analysis – data gathering, collection, analysis and assimilation, trend reporting, etc. You will gain a deeper understanding of developments relating to the renewable industry in this role.

Job Functions:

- Conduct internet and subscription based research on power markets across the US and Canada
- Run monthly and ad-hoc reports based on research gathered
- Review and analyze special areas of interest relative to renewable generation projects – solar and wind technologies
- Participate in identified webinars and summarize findings
- Presentation of research (report writing, collaborative presentation)

Minimum Qualifications:

- 2nd to 4th year student attending College or University with a focus on Marketing or Economics
- Market research experience of both public sources/records and purchased/private access data-bases
- Data collection, analysis and presentation skills
- Basic understanding of financial metrics that drive financial success in private enterprise
- Strong working knowledge relating to commodity market fundamentals
- Strong Microsoft Office skills
