EXPANDED AGENDA

Day 1 – November 10, 2022

12:45 Sign-in on Zoom

1:00 Opening Remarks – Recent months have witnessed huge macroeconomic challenges on multiple fronts – uncertainty about pandemic recovery, inflation, supply chain challenges, the effects of war, and the dramatic manifestation of climate risk events. This conference brings together leading academics, practitioners, standard-setters and regulators to better understand the complex challenges posed for investors and for professional accountants in meeting their functional obligations, thought leadership objectives, and in protecting the public interest. Keynote speakers and panelists will address these challenges, and comment on and debate adjustments made, and longer-term practices and ideas developed and/or modified.

Leonard J. Brooks, Director, Professional Accounting Centre
Soo Min Toh, Director, Institute for Management & Innovation, UTM
Craig Smith, EVP, Member & Student Services, CPA Ontario
Lakshmanan Shivakumar,  
Professor, London Business School

Professor Lakshmanan Shivakumar is a prolific and influential academic researcher, who has been invited to talk at universities and conferences in over 25 countries. He was formerly the subject area Chair for the Accounting group at London Business School and has been a member of the School’s Executive Committee. He has held visiting positions at the University of Chicago Graduate School of Business, the Indian School of Business, the Australian National University, Singapore Management University, and the University of New South Wales. He has been a member of the academic council for the University of Cyprus and a council member of the American Accounting Association.

His main research interests are in the areas of financial reporting quality, stock-return predictability, and macro-accounting. He has published articles in several top-tier accounting and finance journals and is (or has been) a co-editor of the Review of Accounting Studies and The Accounting Review. His research on financial reporting quality includes an examination of the role of conservatism in financial reporting and earnings management in firms issuing public equity. On stock return predictability, his research has addressed issues relating to the causes of underlying price momentum and post-earnings-announcement drift anomalies. His studies have explained how aggregate corporate profits drive future inflation and how corporate taxes affect macroeconomic growth.

An award-winning teacher, Shivakumar teaches Financial Statement Analysis, Securities Analysis and Financial Modelling. He also consults for bankers and consulting firms on valuation, financial analysis and investment strategies. His research has been presented to regulators and development agencies worldwide, including the African Development Bank, the Federal Reserve Bank of New York and the Singapore Stock Exchange. He is a member of the Financial Reporting Advisory Board, which advises the UK Government on its financial reports.
