**BIOLOGY FOR HEALTH SCIENCES (HSBc)**

*Department of Biology*

**Biology for Health Sciences** focuses on areas of biological science that relate to the health of humans and will provide a strong foundation for students interested in pursuing a career in the health sciences.

UTM Biology is a dynamic community. With nearly 40 active research scientists, more than seventy graduate students and many post-doctoral fellows doing state-of-the-art research using the latest techniques, our students will have the opportunity to learn from the best. Our undergraduate research projects and summer student placements in research labs will give students valuable, first-hand experience working in a laboratory environment.

---

**MAKE THE MOST OF YOUR TIME AT UTM!**

We want to help you maximize your university experience, so we’ve pulled together information and interesting suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are mentioned. In fact, activities such as joining an academic society, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study at UTM. Read through the chart and create your own plan using [My Program Plan](www.utm.utoronto.ca/program-plans) found at [www.utm.utoronto.ca/program-plans](www.utm.utoronto.ca/program-plans).

**Programs of Study (POSt)**

- Major Program ERMAJ1149 Biology for Health Sciences (Science)

**Check out...**

Interested in examining cardiovascular, renal, respiratory and muscle systems’ response to challenges such as altitude and depth under water? BIO414H5 examines these responses and provides students with hands on laboratory activities measuring physiological variables in these systems. In BIO380H5 you’ll see how a human embryo becomes organized so that all of the tissues and organs of the adult body form in the right places at the proper times.

**What can I do with my degree?**

The career you choose will depend on your experience and interests. Visit the Career Centre to explore your career options.

**Careers for Graduates:** Biological technician; Health records professional; Veterinary technician; Paramedic; Chiropractor; Pharmacologist; Massage therapist; Clinical research coordinator assistant; Informationist; Community health worker; Doctor; Nurse; Physician’s assistant; Health policy analyst; Patient services coordinator; Dietitian; Occupational therapist.

**Workplaces:** Scientific R&D; Conservation authorities; Pharmaceutical; Consumer health libraries; Non-profit agencies; Hospitals and medical centres.
### 1ST YEAR
- Enroll in courses: BIO150H5, 153H5; CHM110H5, 120H5; and MAT123H5, 134H5.
- Choose a program of study (Subject POSH) once you complete 4.0 credits. Use the Degree Explorer and the Academic Calendar to plan your degree.
- Develop foundational academic skills and strategies by enrolling in a student-led course. Build community and gain academic support through LAUNCH. Join a RGASC Peer Facilitated Study Group.

### 2ND YEAR
- Enroll in courses: BIO202H5, BIO206H5, BIO207H5, BIO208H5, BIO209H5, BIO259H5, or PSY201H5 or STA212H5.
- Attend the RGASC’s Program for Accessing Research Training (P.A.R.T.) to enhance your research skills.
- Use the Career & Co-Curricular Learning Network (CCLN) to find postings for on- and off-campus work and volunteer opportunities as well as Work-Study.
- Ask your professor about volunteering in their lab.

### 3RD YEAR
- Enroll in BIO204, 310 and 380. Attend 1.0 credits from one of the following categories: Cell, Molecular and Biotechnology Stream; Neuroscience Stream; or the Genes and Behaviour Stream. View the Academic Calendar.
- Throughout your undergraduate degree:
  - use the Degree Explorer to ensure you complete your degree and program requirements.
  - see the Office of the Registrar about degree requirements and the Biology Undergraduate Advisor about program requirements.
- Explore your interests. Why not pass on your passion for science? Be a UTM Let’s Talk Science Outreach volunteer.
- Apply to become a Wellness Ambassador with the Health & Counselling Centre’s Physical Health team.

### 4TH OR FINAL YEAR
- Ensure you have 8.5 BIO credits and at least 2.0 credits at the 300/400 level. Speak to the Biology Undergraduate Advisor for advice details.
- Apply to the Ontario Ministry of Natural Resources Internship Program as a recent graduate. Look at the MNRF website for eligibility and application details.
- Gain research skills by working one-on-one with graduate students and a professor through BIO481Y5. Speak to the Biology Undergraduate Advisor.

### HOw To USE THIS PROGRAM PLAN
- Read through each year. Investigate what appeals to you here and in any other Program Plans that apply to you.
- Visit [www.utm.utoronto.ca/program-plans](http://www.utm.utoronto.ca/program-plans) to create your own plan using My Program Plan.
- Update your plan yearly.

### HOW TO USE THIS PROGRAM PLAN
- Visit [www.utm.utoronto.ca/program-plans](http://www.utm.utoronto.ca/program-plans) for the online version and links.
Skills developed in Biology

To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

**Communication & interpersonal**: write scientific reports; present research findings; interact professionally with a multidisciplinary team of researchers, technicians, students and professors; and literacy writing.

**Research**: collect and preserve field organisms; dissect preserved or euthanized specimen; inspect specimens; and analyze and evaluate information.

**Technical**: use specialized computer programs; perform laboratory procedures; maintain laboratory equipment and instrumentation; and comply with quality control procedures.

**Quantitative**: analyze data for trends and apply statistical tests to data.

**Critical thinking & problem-solving**: logically interpret trends and results.

Get involved

Check out the 100+ student organizations on campus. Here are a few:

- Erindale Biology Society (EBS)
- UTM Student Union (UTMSU)
- UTM Athletics Council (UTMAC)

For a listing of clubs on campus visit www.utm.utoronto.ca/clubs.

Services that support you

- Accessibility Services (AS)
- Career Centre (CC)
- Centre for Student Engagement (CSE)
- Equity, Diversity & Inclusion Office (EDIO)
- Experiential Education Unit (EEU)
- Health & Counselling Centre (HCC)
- Indigenous Centre (IC)
- International Education Centre (IEC)
- Office of the Registrar (OR)
- Recreation, Athletics and Wellness Centre (RAWC)
- Robert Gillespie Academic Skills Centre (RGASC)
- UTM Library, Hazel McCallion Academic Learning Centre (HMALC)

Department of Biology

William G. Davis Building, Rm 3056
University of Toronto Mississauga
3359 Mississauga Rd
Mississauga ON Canada L5L 1C6

Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The Grade 12 prerequisites for this program are Advanced Functions, Biology and Chemistry. The approximate average required for admission is low- to mid-80s. More information is available at utm.utoronto.ca/viewbook.

**NOTE**: During the application process, applicants will select the Life Sciences admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

Sneak Peek

Interested in the design of the human body? Learn the fundamentals of human anatomy and physiology in BIO210Y5. Students have access to our herbarium which houses about 95,000 specimens of plants.

Effective biological training involves careful study of real organisms, both living and dead. Consequently, almost all Biology courses with laboratories involve students in one or more of the following activities with animals, plants, and/or microorganisms: collecting and preserving organisms from the field; dissecting or handling preserved or euthanized specimens (or properly anaesthetized living specimens); observing and making measurements on organisms maintained under laboratory conditions approved by the Canadian Council of Animal Care.
