Life Science? It began with Physics! Physics encompasses the study of the universe from the largest galaxies to the smallest subatomic particles. Want skills? Physicists learn them! Physicists are problem solvers. Their analytical skills make physicists versatile and adaptable so they work in interesting places.

Want a job? People hire physicists! Physics brings a broad perspective to any problem. Because they learn how to consider any problem they are not bound by context. Like money? Physics beats other sciences! Even when the job market is slow, physicists get job offers for well-paying jobs. Employers know that a physicist brings additional skills with expertise and pay accordingly.

MAKE THE MOST OF YOUR TIME AT UTM!

We want to help you maximize your university experience, so we’ve pulled together information and interesting suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are mentioned. In fact, activities such as joining an academic society, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study at UTM. Read through the chart and create your own plan using My Program Plan found at www.utm.utoronto.ca/program-plans

Programs of Study (POSt)

- Specialist Program ERSPE1944 Biomedical Physics Specialist (Science)
- Major Program ERMAJ1944 Physics (Science)
- Minor Program ERMIN1944 Physics (Science)

Check out...

Have a soft spot for quantum mechanics? Check out JCP321H5. Curious about lasers and radiation? Then get excited for PHY451H5! Topics include electromagnetism, light metal interactions, multipole radiation and simple models of optical dispersion.

What can I do with my degree?

The career you choose will depend on your experience and interests. Visit the Career Centre to explore your career options.

Careers for Graduates: Acoustic emissions technician; Astrophysicist; Laser fusion scientist; Material scientist; Medical physicist; Nuclear medical technologist; Optical technician; Planetarium guide; Quality controller; Radiation safety technician; Science journalist; Seismic analyst; Sound engineer.

Workplaces: Aerospace; Energy development; Government; Renewable energy; Research laboratories; Manufacturing; Observatories; Planetariums; Research centres; Space industry.
**PHYSICS MAJOR Program Plan**

### 1st YEAR
- **Enrol in courses** (PHY146H5 and PHY147H5) or (PHY136H5 or PHY137H5). (MAT135H5 and MAT136H5) or MAT135Y5 or MAT137Y5 or ISP100H5.
- Choose a program of study (Subject POS1) once you complete 4.0 credits. Use the Degree Explorer and the Academic Calendar to plan your degree.
- Develop foundational academic skills and strategies by enrolling in a utmONE course. Build community and gain academic support through LAUNCH. Join a RGASC Peer Facilitated Study Group.

### 2nd YEAR
- **Enrol in courses** PHY241H5, PHY245H5, JCP221H5, JCP265H5.
- Consider applying for Research Opportunity Program (ROP) courses PHY299Y and PHY399Y. Visit the EEU for ROP Course Prerequisites. Attend the RGASC’s Program for Accessing Research Training (P.A.R.T.) to enhance your research skills.
- Use the Career & Co-Curricular Learning Network (CLNU) to find postings for on- and off-campus work and volunteer opportunities.
- Work on-campus through the Work-Study program. View position descriptions on the CLN.
- Sign up to become an Experiential Education Unit Student Ambassador and earn a CCR notation.
- Networking simply means talking to people and developing relationships with them. Start by joining the UTM Physics Club. Go to the Enriche Chemical & Physical Sciences Society’s Meet the Pros Night.
- Visit the UTM Library Reference Desk.

### 3rd YEAR
- **Enrol in courses** PHY324H5, PHY325H5, PHY343H5, PHY347H5, PHY451H5, JCP321H5, 322H5 and 421H5 to complete the Physics major.
- Throughout your undergraduate degree:
  - use the Degree Explorer to ensure you complete your degree and program requirements.
  - see the Office of the Registrar and the CPS Academic Counsellor.
- **Apply to TRIUMF** - Canada’s national laboratory for particle and nuclear physics - that accepts 70 undergraduate students from across the country and abroad every year as part of its Undergraduate Student Program.
- **Apply for NSERC Undergraduate Program awards e.g. USRA** to work in a lab in the summer.
- **Establish a professional presence on social media** (e.g., LinkedIn).
- **Earn credits overseas**! Apply to study for a summer, term or year at one of 140+ universities. The CPS department has identified partnerships which are most relevant to our students. Speak to the IEC for details about Course Based Exchange, funding and travel safety.

### 4th OR FINAL YEAR
- **Senior students complete a research project.** Speak to the CPS Academic Counsellor to discover available opportunities such as Independent Study Courses PHY473H5 (Supervised Reading) and CPS489Y5 (Introduction to Research in the Chemical and Physical Sciences).
- Log on to ACORN and request graduation.

### HOW TO USE THIS PROGRAM PLAN
Read through each year. Investigate what appeals to you here and in any other Program Plans that apply to you.

Visit [www.utm.utoronto.ca/program-plans](http://www.utm.utoronto.ca/program-plans) to create your own plan using My Program Plan.

Update your plan yearly.

---

*Consult the Academic Calendar for greater detail on course requirements, program notes and degree requirements.*

Revised on: 8/30/2022

Visit [www.utm.utoronto.ca/program-plans](http://www.utm.utoronto.ca/program-plans) for the online version and links.
Skills developed in Physics

To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

**Technical**: strong emphasis on lab work using state-of-the-art technology as well as advanced instrumentation and numerical computation.

**Written & oral communication**: explain complex concepts and theories to others, as well as clearly explain scientific research and write reports.

**Research**: define a problem; establish hypotheses; apply and integrate fundamental scientific principles; gather scientific data; and review scientific literature.

**Problem-solving**: see relationships among factors; analyze data; and interpret observations.

Get involved

Check out the 100+ student organizations on campus. Here are a few:

- UTM Physics Club
- Erindale Chemical and Physical Sciences Society (ECPS)
- UTM Student Union (UTMSU)
- UTM Athletics Council (UTMAC)

For a listing of clubs on campus visit www.utm.utoronto.ca/clubs.

Services that support you

- Accessibility Services (AS)
- Career Centre (CC)
- Centre for Student Engagement (CSE)
- Experiential Education Unit (EEU)
- Equity, Diversity & Inclusion Office (EDIO)
- Health & Counselling Centre (HCC)
- Indigenous Centre (IC)
- International Education Centre (IEC)
- Office of the Registrar (OR)
- Recreation, Athletics and Wellness Centre (RAWC)
- Robert Gillespie Academic Skills Centre (RGASC)
- UTM Library, Hazel McCallion Academic Learning Centre (HMALC)

Department of Chemical & Physical Sciences

William Davis Building, 4037A University of Toronto Mississauga 3359 Mississauga Rd Mississauga ON Canada L5L 1C6

FUTURE STUDENTS

Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. Your admission average is calculated using English plus your next best five courses. The Grade 12 prerequisites for Physics are Advanced Functions, Physics and Chemistry. The approximate average required for admission is mid- to high-70s. More information is available at utm.utoronto.ca/viewbook.

NOTE: During the application process, applicants will select the Chemical & Physical Sciences admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

Sneak Peek

Want to learn about the mysteries of Schrodinger’s cat and other quantum phenomena? Take JCP321H5 and then go even deeper with JCP421H5. You’ll never see the world the same way again!

Our students have access to new, state-of-the-art teaching laboratories and are involved in cutting-edge research projects in our research labs. Our physics equipment ranges from basic mechanic setups all the way to an atomic force microscope (AFM) that can achieve single atom resolution. We have an active undergraduate student club - the UTM Physics Club – to provide students with an opportunity for fun physics-based activities. To date, the main focus has been building a Tesla coil that will play music.
