

# ANTHROPOLOGY (HBSc)

## Department of Anthropology

**Anthropology** is the study of humankind from its beginnings to the present day. Many disciplines concern themselves with humans, but only anthropology seeks to understand the whole panorama of human existence — in geographic space and evolutionary time — through comparative and holistic study.

The research interests of our full-time faculty members reflect the broad mandate of anthropology as a discipline. We cover the traditional four subfields of anthropology: archaeology, biological anthropology, linguistic anthropology and sociocultural anthropology. Our strengths include forensic anthropology and the anthropology of health.

## MAKE THE MOST OF YOUR TIME AT UTM!

We want to help you maximize your university experience, so we've pulled together information and interesting suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are mentioned. In fact, activities such as joining an academic society, engaging with faculty and seeking opportunities to gain experience should occur in each year of your studies at UTM. Read through the chart and create your own plan using **My Program Plan** found at [www.utm.utoronto.ca/program-plans](http://www.utm.utoronto.ca/program-plans)

### Programs of Study (POSt)

- Specialist Program ERSPE0105 Anthropology (Science)
- Major Program ERMAJ0105 Anthropology (Science)

### Check out...

Why not get some hands-on experience? Enrol in one of our field courses such as ANT306H5, which provides an introduction to forensic anthropological field techniques and scene interpretation. Students examine casts, maps, photos and other evidence collected in the field, for the purposes of scene reconstruction and presentation in court.

### What can I do with my degree?

The career you choose will depend on your experience and interests. Visit the Career Centre to explore your career options.

**Careers for Graduates:** Public health educator; Field technician; Museum technician; Forensic anthropologist; Primatologist; Archaeologist; Laboratory technician; Preservationist/restorer; First Nations conservator and stewardship liaison; Native services worker.

**Workplaces:** Museums/art galleries; Archaeological consulting; Community organizations; Environmental agencies; Police and coroner's office.

## Skills developed in Anthropology

To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

**Cultural awareness & interpersonal:** sensitivity to cultural differences and diversity; work cooperatively with others; and understand group dynamics.

**Written & oral communication:** attention to detail; present and defend a position; summarize results; and present theories/ideas/viewpoints in a comprehensive manner.

**Technical:** preserve objects by selecting chemical treatment, temperature, humidity; and draw maps and construct models to scale; photograph sites, objects, people, occasions.

**Research & analysis:** carry out data collection and evaluate research results; and catalogue information.

## Get involved

Check out the 100+ student organizations on campus. Here are a few:

- UTM Anthropology Society (UTMAS)
- UTM Student Union (UTMSU)
- UTM Athletics Council (UTMAC)

## FUTURE STUDENTS

### Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The approximate average required for admission is low- to mid-80s. More information is available at [utm.utoronto.ca/viewbook](http://utm.utoronto.ca/viewbook).

**NOTE:** During the application process, applicants will select the Life Sciences admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

### Sneak Peek

How are archaeological data recovered through excavation? Learn how archaeological data are organized and analyzed and what archaeological data tell us about the human past. What is the connection between health and anthropology? Experience how medical anthropologists conduct their fieldwork by testing growth and development, diet, and activity lab methods.

UTM Anthropology has two new teaching laboratory spaces with a large collection of archaeological artifacts, fossils and human skeletons. Learn human skeletal anatomy; examine fossil casts close up; or work with archaeological artifacts with a small group of peers, your TA and the instructor.
