**BIOLOGY (HBSc)**

*Department of Biology*

**Biology** is the study of living organisms and involves observation and analysis of the tree of life. The foundation of biology is based upon the core concepts of evolution: natural selection and speciation. The study of biology is applicable to all facets of life, helping address such major problems as conservation, overpopulation, pollution, medicine and disease.

UTM Biology is a dynamic community. With over two dozen active research scientists, more than forty graduate students and many post-doctoral fellows doing state-of-the-art research using the latest techniques, our students will have the opportunity to learn from the best. Our undergraduate research projects and summer student placements in research labs will give students valuable, first-hand experience working in a laboratory environment.

---

**MAKE THE MOST OF YOUR TIME AT UTM!**

We want to help you maximize your university experience, so we’ve pulled together information and interesting suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are mentioned. In fact, activities such as joining an academic society, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study at UTM. Read through the chart and create your own plan using My Program Plan found at [www.utm.utoronto.ca/program-plans](http://www.utm.utoronto.ca/program-plans).

---

**Programs of Study (POSt)**

- Specialist Program ERSPE2364 Biology (Science)
- Major Program ERMAJ2364 Biology (Science)
- Minor Program ERMIN2364 Biology (Science)

**Check out...**

How do plants compete and defend? Learn about the population and community ecology of plants in BIO330H5. What’s the connection between animal behaviour and their physiology? Find out in BIO318Y5 which seeks to understand what mechanisms underlie behaviour.

**What can I do with my degree?**

The career you choose will depend on your experience and interests. Visit the Career Centre to explore your career options.

**Careers for graduates:** Biological technician; Environmental educator; Greenhouse grower; Paramedic; Science magazine editor/ writer; Zoology field researcher; Informationist; Doctor; Physician's assistant; Nurse; Quality controller; Food science technologist; Aquaculture technician; Botanist; Herbarium technician; Dietician.

**Workplaces:** Manufacturing and processing; Government; Industrial inspection firms; Scientific R&D; Conservation authorities; Zoos, aquariums, national/ provincial parks; Pharmaceutical; Academic medical centres/laboratories; Health care.
# HOW TO USE THIS PROGRAM PLAN

Read through each year. Investigate what appeals to you here and in any other Program Plans that apply to you.

Visit [www.utm.utoronto.ca/program-plans](http://www.utm.utoronto.ca/program-plans) to create your own plan using My Program Plan.

Update your plan yearly.

---

**1st YEAR**

**Enrol in courses BIO150H5, 153H5, CHM110H5, 120H5; and MAT132H5, 134H5.**

**Attain 1.0 credit from the second list of required first year courses in the Academic Calendar.**

**Choose a program of study (Subject POSO) once you complete 4.0 credits.**

**Use the Degree Explorer Planner and the Academic Calendar to plan your degree.**

**Start strong and get informed with utmONE and LAUNCH through the Centre for Student Engagement (CSE).**

**Join a RGASC Peer Facilitated Study Group.**

**Use the Co-Curricular Record (CCR).**

**Search for opportunities beyond the class room, and keep track of your accomplishments.**

**Attend the Get Experience Fair through the Career Centre (CC) to learn about on- and off-campus opportunities.**

**Networking simply means talking to people and developing relationships with them.**

**Start by joining the Erindale Biology Society (EBS).**

**Go to the EBS Meet the Prof Night, or the Biology department’s Walk with your Professor.**

**Visit the UTM Library Reference Desk.**

**Attend events held by the International Education Centre (IEC), whether you are an international or domestic student.**

**Explore different cultures through food, music, sport or through sight-seeing around the GTA.**

---

**2nd YEAR**

**Enrol in courses BIO210H5, 203H5; 209H5, 206H5, 207H5; and STA215H5/PSY201H5.**

**Consider applying for the Research Opportunity Program (ROP) courses BIO299Y and BIO399Y.**

**Visit the EEU to ensure you complete your degree and program requirements.**

**Ask your professor about volunteering in their lab.**

**Do you have a professor you really like or connect with?**

**Ask them a question during office hours.**

**Discuss an assignment. Go over lecture material. Don’t be shy! Learn Tips On How to Approach a Professor available through the Experiential Education Unit (EEU).**

**Get involved in the community! Volunteer for a Community Day Event through the CSE, and build your skills in intercultural communication and teamwork!**

---

**3rd YEAR**

**Attain 2.0 credits in Biology from the 300 or 400 level.**

**Throughout your undergraduate degree:**

- use the Degree Explorer to ensure you complete your degree and program requirements.

- see the Office of the Registrar about degree requirements and the Biology Undergraduate Advisor about program requirements.

---

**4th OR FINAL YEAR**

**Conduct a research project under the supervision of a faculty member through BIO481Y5.**

**Speak to the Biology Undergraduate Advisor for advice and details.**

**Log on to ACORN and request graduation.**

**Learn techniques biologists use in the field! Use field ornithology techniques in BIO306H4S, and observe and analyze animal behaviour in BIO318Y5.**

**Speak to the Biology Undergraduate Advisor.**

**Explore your interests. Become a Wellness Ambassador with the Health & Counselling Centre’s Physical Health team.**

**Establish a professional presence on social media (e.g. LinkedIn).**

**Curious about grad school? Connect with a grad student through the CSE’s Grad Connect program to get the inside scoop.**

---

**P.A.R.T. (ROP)**

**Consider applying for the Research Opportunity Program to enhance your research skills.**

**Log on to ACORN and request graduation.**

**Learn about degree requirements with the Biology Undergraduate Advisor.**

**Join a professional association. Check out the Association of Professional Biology or the Canadian Society of Plant Biologists.**

**Gain research skills by working one-on-one with graduate students and a professor through BIO481Y5.**

**Speak to the Biology Undergraduate Advisor.**

**Join a professional association. Check out the Association of Professional Biology or the Canadian Society of Plant Biologists.**

**Get a global experience through our Biology Seminar Series. Every Friday during the academic year, the Department of Biology hosts an exciting seminar given by a guest speaker.**

**Guest speakers are from Ontario, across Canada, as well as International. Topics cover every aspect of biology. All Biology students are welcome to attend. Feel free to bring your lunch!**

**Attend the Mastering the Personal Statement workshop available through the Experiential Education Unit (EEU).**

**Establish a professional presence on social media (e.g. LinkedIn).**

**Curious about grad school? Connect with a grad student through the CSE’s Grad Connect program to get the inside scoop.**

Skills developed in Biology

To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

Communication & interpersonal: write scientific reports; present research findings; interact professionally with a multidisciplinary team of researchers, technicians, students and professors; and literacy writing.

Research: collect and preserve field organisms; dissect preserved or euthanized specimen; inspect specimens; and analyze and evaluate information.

Technical: use specialized computer programs; perform laboratory procedures; maintain laboratory equipment and instrumentation; and comply with quality control procedures.

Quantitative: analyze data for trends and apply statistical tests to data.

Critical thinking & problem-solving: logically interpret trends and results.

Get involved

Check out the 100+ student organizations on campus. Here are a few:

- Erindale Biology Society (EBS)
- UTM Student Union (UTMSU)
- UTM Athletics Council (UTMAC)

For a listing of clubs on campus visit www.utm.utoronto.ca/clubs.

Department of Biology

William G. Davis Building, Rm 3056
University of Toronto Mississauga

FUTURE STUDENTS

Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The Grade 12 prerequisites for this program are Advanced Functions, Biology and Chemistry. The approximate average required for admission is low- to mid-80s. More information is available at utm.utoronto.ca/viewbook.

NOTE: During the application process, applicants will select the Life Sciences admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

Sneak Peek

What’s in your genes? Take BIO207H5 to find out about the principles of Mendelian inheritance and modern genetics. Our department also offers students access to our herbarium which houses about 95,000 specimens of vascular plants.

Effective biological training involves careful study of real organisms, both living and dead. Consequently, almost all Biology courses with laboratories involve students in one or more of the following activities with animals, plants, and/or microorganisms: collecting and preserving organisms from the field; dissecting or handling preserved or euthanized specimens (or properly anaesthetized living specimens); observing and making measurements on organisms maintained under laboratory conditions approved by the Canadian Council of Animal Care.
