BIOTECHNOLOGY (HBSc)

Department of Biology

Biotechnology is the “application of scientific and technical advances in life science to develop commercial products”. This discipline combines biological sciences (genetics, biochemistry, molecular biology, microbiology, cell biology) with other science disciplines (chemistry, engineering, information technology, robotics, etc.). Advancement in biotechnology sees direct application in agriculture (e.g. genetic modification of food, environmental products), medicine (e.g. drug production, gene therapy), and industry (e.g. ‘white biotechnology’). With such rapid growth in this area, biotechnologists will play a vital role in shaping the future.

MAKE THE MOST OF YOUR TIME AT UTM!

We want to help you maximize your university experience, so we’ve pulled together information and interesting suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are mentioned. In fact, activities such as joining an academic society, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study at UTM. Read through the chart and create your own plan using My Program Plan found at www.utm.utoronto.ca/program-plans

Programs of Study (POSt)
- Specialist Program ERSPE1118 Biotechnology (Science)
- Minor Program ERMIN2364 Biology (Science)

Check out...
Learn how to clone! In BIO314, you’ll perform advanced molecular biology techniques including cloning and transformation of bacteria and plants. Get excited about disease! In BIO315H5 you’ll learn exciting new topics in the structure and function of normal and diseased cells.

What can I do with my degree?
The career you choose will depend on your experience and interests. Visit the Career Centre to explore your career options.

Careers for graduates: Pharmaceutical financial analyst; Biological technician; Regulatory / government affairs specialist; Compliance promotion specialist; Pharmacologist; Informationist; Doctor; Physician’s assistant; Nurse; Quality controller; Food science technologist / food scientist; Biotechnologist.

Workplaces: Manufacturing and processing; Government; Scientific R&D; Zoos, aquariums, national/ provincial parks; Hospitals and medical centres; Pharmaceutical; Academic medical centres/ laboratories; Consulting firms.
## BIOTECHNOLOGY SPECIALIST Program Plan

### HOW TO USE THIS PROGRAM PLAN

Read through each year. Investigate what appeals to you here and in any other Program Plans that apply to you.

Visit [www.utm.utoronto.ca/program-plans](http://www.utm.utoronto.ca/program-plans) to create your own plan using My Program Plan. Update your plan yearly.

### PLAN YOUR ACADEMICS*

<table>
<thead>
<tr>
<th>1ST YEAR</th>
<th>2ND YEAR</th>
<th>3RD YEAR</th>
<th>4TH OR FINAL YEAR</th>

| Enrol in courses BIO155H5, 153H5, CHM110H5, 120H5; and MAT134Y5, 135Y5, 137Y5. Attain 1.0 credit from the second list of required first year courses in the Academic Calendar. Choose a program of study (Subject POSH) once you complete 4.0 credits. Use the Degree Explorer Planner and the Academic Calendar to plan your degree. Start strong and get informed with utmONE and LAUNCH through the Centre for Student Engagement (CSE). Join a RGASC Peer Facilitated Study Group. | Enrol in MGM101H5, 150H5; BIO200H5, 203H5, 203H5; 206H5, 207H5; CHM211H5, 242H5, 243H5; and STA215H5. Attend the RGASC's Program for Accessing Research Training (P.A.R.T.) to enhance your research skills. | For third year and higher, view the Academic Calendar for course requirements and options. Throughout your undergraduate degree:  
- use the Degree Explorer to ensure you complete your degree and program requirements.  
- see the Office of the Registrar about degree requirements and the Biology Undergraduate Advisor about program requirements. | Attain 1.0 credit from CHM/BIO courses at the 400 level. Ensure you have at least 7.0 credits at the 300/400 level, of which 1.5 must be at the 400 level. Gain practical collaborative research experience! Apply for JCB487YS. Speak to the Biology Undergraduate Advisor. Log on to ACORN and request graduation. |

| Use the Co-Curricular Record (CCR). Search for opportunities beyond the classroom, and keep track of your accomplishments. Attend the Get Experience Fair through the Career Centre (CC) to learn about on- and off-campus opportunities. Networking simply means talking to people and developing relationships with them. Start by joining the Erindale Biology Society (EBS). Follow them @utmbio. Go to the EBS Meet the Prof Night, or the Biology department's Walk with your Professor. Visit the UTM Library Reference Desk. | Use the Career Learning Network (CLN) to find postings for on- and off-campus work and volunteer opportunities as well as Work-Study. Do you have a professor you really like or connect with? Ask them a question during office hours. Discuss an assignment. Go over lecture material. Don’t be shy! Learn Tips On How to Approach a Professor available through the Experiential Education Unit (EEU). | Explore your interests. Why not pass on your passion for science? Be a UTM Let’s Talk Science Outreach volunteer. Establish a professional presence on social media (e.g., LinkedIn). Curious about grad school? Connect with a grad student through the CSE’s Grad Connect program to get the inside scoop. Interested in deepening your global perspective? Register for the Global Citizenship Certificate offered by the IEC. Get involved with a Community Action Project through the CSE and build your skills in intercultural communication and teamwork! | Apply to the Ontario Ministry of Natural Resources Internship Program as a recent graduate. Look at the MNRF website for eligibility and application details. Join a professional association. Check out the Canadian Association for Plant Biotechnology. Go to the Ontario Biology Day, or the Canadian Undergraduate Conference on Healthcare. Why not work abroad? Read up on worldwide employment trends and industry outlooks through GoinGlobal. Attend the Go Global Expo. |
| **PHASE 1** Explore careers through the CC’s BioPath: Professional Development Program. Ask the Biology Undergraduate Assistant about the BioPath Professional Development Program. Explore careers through the CC’s External Job Shadowing Program. Ask the Biology Undergraduate Assistant about the BioPath Professional Development Program. Explore further education? Attend the CC’s Graduate and Professional Schools Fair. Talk to professors – they are potential mentors and references for further education. | **PHASE 1** Explore careers through the CC’s BioPath: Professional Development Program. Ask the Biology Undergraduate Assistant about the BioPath Professional Development Program. Consider further education? Attend the CC’s Graduate and Professional Schools Fair. Talk to professors – they are potential mentors and references for further education. | **PHASE 1** Explore careers through the CC’s BioPath: Professional Development Program. BIOTECHNOLOGY

Skills developed in Biotechnology

To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

Communication & interpersonal: write scientific reports; present research findings; interact professionally with a multidisciplinary team of researchers, technicians, students and professors; and literacy writing.

Research: conduct journal research and utilize logical reasoning to interpret results/data derived from scientific experimentation.

Technical: use specialized computer programs; perform laboratory procedures; maintain laboratory equipment and instrumentation; and comply with quality control procedures.

Quantitative: analyze data for trends and apply statistical tests to data.

Critical thinking & problem-solving: logically interpret trends and results.

Get involved

Check out the 100+ student organizations on campus. Here are a few:

- Erindale Biology Society (EBS)
- UTM Student Union (UTMSU)
- UTM Athletics Council (UTMAC)

For a listing of clubs on campus visit www.utm.utoronto.ca/clubs.

Services that support you

- Accessibility Services (AS)
- Career Centre (CC)
- Centre for Student Engagement (CSE)
- Experiential Education Unit (EEU)
- Health & Counselling Centre (HCC)
- Indigenous Centre (IC)
- International Education Centre (IEC)
- Office of the Registrar (OR)
- Recreation, Athletics and Wellness Centre (RAWC)
- Robert Gillespie Academic Skills Centre (RGASC)
- UTM Library, Hazel McCallion Academic Learning Centre (HMALC)

FUTURE STUDENTS

Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The Grade 12 prerequisites for this program are Advanced Functions, Biology and Chemistry. The approximate average required for admission is low- to mid-80s. More information is available at utm.utoronto.ca/viewbook.

NOTE: During the application process, applicants will select the Life Sciences admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

Sneak Peek

Curious about pharmacology? Take BIO200H5 and learn about the absorption and calculation of dosages. Our courses are taught by faculty from the departments of Biology, Chemistry and Management, as well as from the Master of Biotechnology.

Effective biological training involves careful study of real organisms, both living and dead. Consequently, almost all Biology courses with laboratories involve students in one or more of the following activities with animals, plants, and/or microorganisms: collecting and preserving organisms from the field; dissecting or handling preserved or euthanized specimens (or properly anaesthetized living specimens); observing and making measurements on organisms maintained under laboratory conditions approved by the Canadian Council of Animal Care.
