ECONOMICS (HBA, BCom)

Department of Economics

Economics is a social science that encompasses a particular range of human behaviour and has a strong influence on the structure, well-being, and development of a society. It deals with any issue arising out of the conflict between the demand for goods and services and a limited supply of resources.

Undergraduate training in Economics is intended to familiarize students with the discipline of economic thinking and to equip them for intelligent appraisal of contemporary economic problems. It is also intended to make students aware of the nature of economic science and of the directions in which economic theory is moving.

MAKE THE MOST OF YOUR TIME AT UTM!

We want to help you maximize your university experience, so we’ve pulled together information and interesting suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are mentioned. In fact, activities such as joining an academic society, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study at UTM. Read through the chart and create your own plan using My Program Plan found at www.utm.utoronto.ca/program-plans

Programs of Study (POST)

Skills developed in Economics
To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

Communication: explain complex concepts and theories to others.

Information gathering: analyze the multiple dimensions of a problem and select what is important and understand the impact of factors influencing economic growth.

Critical thinking & problem-solving: analyze problems and organize ways of thinking about problems to strategize options.

Research & statistics: gather economic data relevant to a research problem; employ data analysis research techniques such as statistical analysis and modeling; and strong background in economic theory and econometrics.

FUTURE STUDENTS

Admission to UTM
All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The Grade 12 prerequisite for this program is Advanced Functions. The approximate average required for admission is mid- to high-70s. More information is available at utm.utoronto.ca/viewbook.

NOTE: During the application process, applicants will select the Social Sciences admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

Sneak Peek
Why are some countries richer than others? What are the consequences of opening up trade and investment with the rest of the world? Take ECO202Y5 to discuss these and similar questions. What is microeconomic theory? Find out in ECO206Y5! Topics include oligopoly, pricing, income distribution and welfare economics.

Economics is one of the most popular disciplines among students at UTM. Nearly 50 per cent of all incoming students at UTM take at least one course in economics during their undergraduate studies.
