Linguistics is the scientific study of language. It seeks to understand how is language acquired; what the processes and challenges are of learning two or more languages; how linguistic and social interpretation are essential to the creation of meaning; as well as how individual circumstances impact the use of language. Linguistics offers students extensive knowledge and skills: an understanding of the structure and functions of language, through experimental, theoretical, and socially-informed approaches; insight into how to use language appropriately, by studying the practical aspects of English grammar and by exploring the social value of linguistic structures; experience with the hands-on study of linguistic data, through specific courses in experimental linguistics, as well as through opportunities to be involved in faculty research projects.

MAKE THE MOST OF YOUR TIME AT UTM!

We want to help you maximize your university experience, so we’ve pulled together information and interesting suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are mentioned. In fact, activities such as joining an academic society, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study at UTM. Read through the chart and create your own plan using My Program Plan found at www.utm.utoronto.ca/program-plans

FUTURE STUDENTS

Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The approximate average required for admission is mid- to high-70s. More information is available at utm.utoronto.ca/viewbook.

**NOTE**: During the application process, applicants will select the Humanities admissions category, but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

Sneak Peek

Investigate phonetics in LIN228H5! You’ll discover what sounds are most commonly used in languages and learn to recognize and produce them. Curious about sociolinguistics? Take LIN256H5 and get introduced! You’ll study the social implications of linguistic variation.

Undergraduate linguistics is an essential component of a liberal education because any academic discipline that considers human nature — anthropology, communication, literature, language studies, neuroscience, philosophy, psychology, teaching and learning, among others — must have something to say about the nature of language, how it works, and how it is used.
