POLITICAL SCIENCE (HBA)

Department of Political Science

Politics is about power and Political Science studies the power struggles that lead to policies and issues such as rising tuition and the war in Iraq. Political Science students can explain how bureaucracies work; how great powers rise and fall; the difference between an effective public policy and a misguided one; how to design an unbiased opinion poll; and the factors that shape international decision-making. Political Science students also factor into their analyses philosophical questions, such as who ought to rule? What is legitimacy? Are liberty and equality compatible?

Our department offers students the chance to customize their degrees to their personal interests, to explore the latest topics in politics with the latest teaching methods, and to learn from internationally renowned scholars.
