Numbers are all around us. From the thickness of the ozone layer to infant mortality rates, from the cost of beer to the chances of contracting AIDS, the world is permeated with quantity. Most of the quantitative information we have is incomplete, or an estimate, or an average, or the result of inexact measurement. This does not mean the information is useless. What it means is that to consider ourselves well educated, we must be able to extract knowledge from numerical data that are subject to random error.

Statisticians do things as diverse as setting insurance rates, testing new drugs, estimating levels of air and water pollution, monitoring the quality of industrial products, and predicting the outcomes of national elections.

We want to help you maximize your university experience, so we’ve pulled together information and interesting suggestions to get you started, although there are many more! As you review the chart on the inside pages, note that many of the suggestions need not be restricted to the year they are mentioned. In fact, activities such as joining an academic society, engaging with faculty and seeking opportunities to gain experience should occur in each year of your study at UTM. Read through the chart and create your own plan using My Program Plan found at www.utm.utoronto.ca/program-plans

Programs of Study (POST)
- Specialist Program ERSPE1540 Statistics, Applied (Science)
- Major Program ERMAJ1540 Statistics, Applied (Science)
- Minor Program ERMIN1540 Statistics, Applied (Science)

Check out...
Get excited about surveys, sampling and observational data! Take STA304H5 and learn about several techniques for obtaining information about a large population at relatively small cost. Want to study multivariate data! Enroll in STA437H5 to learn about fundamental methods of data reduction and hypothesis testing for multivariate means and variances.

What can I do with my degree?
The career you choose will depend on your experience and interests. Visit the Career Centre to explore your career options.

Careers for graduates: Actuary; Budget analyst; Insurance underwriter; Logistics specialist; Market research analyst; Mathematical technician; Numerical analyst; Operations research analyst; Statistician; Systems operation analyst; Data entry clerk; Epidemiologist.

Workplaces: Government Agencies; Banks; Investment firms; Insurance companies; Research and development firms.
**STATISTICS, APPLIED SPECIALIST Program Plan**

### HOW TO USE THIS PROGRAM PLAN
Read through each year. Investigate what appeals to you here and in any other Program Plans that apply to you. Visit [www.utm.utoronto.ca/program-plans](http://www.utm.utoronto.ca/program-plans) to create your own plan using **My Program Plan**. Update your plan yearly.

### 1ST YEAR
- **PLAN YOUR ACADEMICS**
  - Enrol in courses CSC108H5, MAT102H5, (132H5, 134H5) and (135H5, 137H5 and 157H5).
  - Choose a program of study (Subject P.O.S.T) once you complete 4.0 credits. Use the Degree Explorer and the Academic Calendar to plan your degree.
  - Develop foundational academic skills and strategies by enrolling in a UTMONE course. Build community and gain academic support through LAUNCH. Join a RGASC Peer Facilitated Study Group.

### 2ND YEAR
- **PLAN YOUR ACADEMICS**
  - Enrol in courses (132H5, 134H5) and (135H5, 137H5 and 157H5). Throughout your undergraduate degree:
    - use the Degree Explorer to ensure you complete your degree and program requirements.
    - see the Office of the Registrar and the MCS Undergraduate Counsellor.

### 3RD YEAR
- **PLAN YOUR ACADEMICS**
  - Enrol in courses STA302H5, 304H5, 305H5 and 348H5. For 3rd year and higher, attain 2.0 credits from (STA312H5, 313H5) and STA360H5, 314H5, 315H5, 413H5, 431H5, 437H5, (441H5, 457H5, 2.0 credits from (132H5, 411H5, MAT130H5, 311H5, 329H5, 334H5, 344H5, 337H5, 378H5); 1.0 additional credit make up of any other STA courses.

### 4TH OR FINAL YEAR
- **PLAN FOR YOUR FUTURE**
  - Conduct a research project under the supervision of a faculty member through STA378H5 and STA478H5. Speak to the MCS Undergraduate Counsellor for details.

### BUILD A NETWORK
- Networking simply means talking to people and developing relationships with them. Start by joining the Mathematical and Computational Sciences Society (MCSS). Follow them on Twitter.
- Get to know your TA. View the Math Learning Centre Schedule on the MCS departmental website. Visit the UTM Library Reference Desk.
- Attend events held by the International Education Centre (IEC), whether you are an international or domestic student. Explore your culture and other cultures through weekly/regular conversations. Language Conversation Circles, debates, and activities to enhance your global and intercultural mindset.
- Students and Recent Graduates Committee. Consider joining their Student Senate. The Statistical Society of Canada. Consider joining their Industrial Mathematics Society. Join a professional association. Check out the Canadian Applied and Industrial Mathematics Society and the Statistical Society of Canada. Consider joining their Undergraduate Work Placement Program. Consider a work-based experience through UTM’s Job Shadowing Program! Attend the CC’s Global Expo. See if you are eligible for UTM Abroad Experience.

### BUILD A GLOBAL MINDSET
- Engage in programs like the Global and Intercultural Fluency Training Series (GIFTS) or learn about and prepare for a future UTM Abroad Experience through the IEC to strengthen and enhance your intercultural skill set, and learn about other cultures while sharing your own!
- Students and Recent Graduates Committee. Consider joining their Seminar Series. Go to the Canadian Statistics Student Conference. Join a professional association. Consider a work-based experience through UTM’s Job Shadowing Program! Attend the CC’s Global Expo. See if you are eligible for UTM Abroad Experience.

### HOW TO USE THIS PROGRAM PLAN
Read through each year. Investigate what appeals to you here and in any other Program Plans that apply to you. Visit [www.utm.utoronto.ca/program-plans](http://www.utm.utoronto.ca/program-plans) to create your own plan using **My Program Plan**. Update your plan yearly.

### BUILD A GLOBAL MINDSET
- Attend the UofT Statistical Sciences department’s Seminar Series.
- Establish a professional presence on social media (e.g., LinkedIn).

### BUILD A NETWORK
- Do you have a professor you really like or connect with? Ask them a question during office hours. Discuss an assignment. Go over lecture material. Don’t be shy! Learn Tips On How to Approach a Professor available through the Experiential Education Unit (EEU).
- Engage in programs like the Global and Intercultural Fluency Training Series (GIFTS) or learn about and prepare for a future UTM Abroad Experience through the IEC to strengthen and enhance your intercultural skill set, and learn about other cultures while sharing your own!

### BUILD SKILLS
- Use the Co-Curricular Record (CCR). Search for opportunities beyond the classroom, and keep track of your accomplishments.
- Attend the Get Experience Fair through the Career Centre (CC) to learn about on- and off-campus opportunities.

### PLAN FOR YOUR FUTURE
- Attend the Program Selection & Career Options workshop offered by the Office of the Registrar and the CC.
- Check out Careers at Major at the CC to see potential career options.
- Explore careers through the CC’s Job Shadowing Program.
- Considering further education? Attend the CC’s Further Education Showcase. Talk to professors – they are potential mentors and references.

### PLAN YOUR ACADEMICS
- Use the Career Learning Network (CLN) to find postings for on- and off-campus work and volunteer opportunities.
- Work on-campus through the Work-Study program. View position descriptions on the CLN.

### BUILD A GLOBAL MINDSET

*Consult the Academic Calendar for greater detail on course requirements, program notes and degree requirements.*
Skills developed in Statistics, Applied

To be competitive in the job market, it is essential that you can explain your skills to an employer. Visit the Career Centre to learn how to articulate and market the following skills:

**Research:** design projects, experiments and other studies; analyze, summarize, make inferences and interpret the information collected; and write effective technical reports.

**Technical:** understand statistical concepts and the rules of logic, as well as use a range of specialized software to analyze large quantities of numerical data.

**Problem-solving:** approach problems from different angles to identify key issues and apply statistical theories and methods to solve problems.

**Critical thinking & communication:** effectively communicate ideas and abstract concepts and construct sound arguments.

Services that support you

- Accessibility Services (AS)
- Career Centre (CC)
- Centre for Student Engagement (CSE)
- Experiential Education Unit (EEU)
- Health & Counselling Centre (HCC)
- Indigenous Centre (IC)
- International Education Centre (IEC)
- Office of the Registrar (OR)
- Recreation, Athletics and Wellness Centre (RAWC)
- Robert Gillespie Academic Skills Centre (RGASC)
- The Math Learning Centre (MLC)
- UTM Library, Hazel McCallion Academic Learning Centre (HMALC)

Get involved

Check out the 100+ student organizations on campus. Here are a few:

- Mathematical and Computational Sciences Society (MCSS)
- UTM Student Union (UTMSU)
- UTM Athletics Council (UTMAC)

For a listing of clubs on campus visit www.utm.utoronto.ca/clubs.

Department of Mathematical & Computational Sciences

Deerfield Hall, Room 3018
University of Toronto Mississauga
3359 Mississauga Rd
Mississauga ON Canada L5L 1C6

FUTURE STUDENTS

Admission to UTM

All program areas require an Ontario Secondary School Diploma, or equivalent, with six Grade 12 U/M courses, or equivalent, including English. The admission average is calculated with English plus the next best five courses. The Grade 12 prerequisites for this program are Advanced Functions and Calculus. The approximate average required for admission is low to mid 80s. More information is available at utm.utoronto.ca/viewbook.

**NOTE:** During the application process, applicants will select the Computer Science, Mathematics & Statistics admissions category but will not officially be admitted to a formal program of study (Specialist, Major, and/or Minor) until after first year.

Sneak Peek

What is statistical modeling? In STA256H5, you’ll learn about probability distributions, expectation, continuous and discrete random variables and vectors, distribution functions and probability’s role in statistical modeling. Why not learn some bootstrapping? Enrol in STA258H5 and learn about statistical methodology with emphasis on the relationship between data analysis and probability theory.
