

# Substitute Assignment der Nederlanden LAMA Lab

---

## Instructions:

Click on the following article and answer the following questions in 2-3 pages (double-spaced).

### *SAMPLE*

[Vanden Bosch der Nederlanden, C.M., Joannis, M.F., Grahn, J.A., Snijders, T.M., Schoffelen, J-M. \(2022\) Familiarity modulates neural tracking of sung and spoken utterances. \*NeuroImage\*, 252.](#)

1. What was the main purpose of the experiment reported in Vanden Bosch der Nederlanden (2022)?
2. Were participants familiar with the music before the study? If not, how did they become familiar? If so, how long had they known the music?
3. What is the dependent variable for the EEG portion of the study?
4. What were the conclusions reached in this article?
5. If you were to summarize this study and provide some key takeaways for your parent or grandparent, how would describe this study and what would you tell them you learned from it?

Once complete, email the assignment to the Undergraduate Assistant at [psyched.utm@utoronto.ca](mailto:psyched.utm@utoronto.ca)

You **MUST** use your 'utoronto' email account.

**From the Code of Behaviour on Academic Matters:** “It shall be an offence for a student to knowingly: represent as one's own any idea or expression of an idea or work of another in any academic examination or term test or in connection with any other form of academic work, i.e. to commit plagiarism. Wherever in the Code an offence is described as depending on "knowing", the offence shall likewise be deemed to have been committed if the person ought reasonably to have known.” All students must refer to this website to obtain information on what constitutes plagiarism. <http://www.writing.utoronto.ca/advice/using-sources/how-not-to-plagiarize>.

**Plagiarism will not be tolerated.**
