Instructions:

Read the following article and answer the following questions in 2-3 pages (double-spaced). If link doesn’t work email to request a copy utmpsych.utm@utoronto.ca

1. What was the positive illusions hypothesis and the self-knowledge hypothesis?

2. What were the independent variables and dependent variables used in Experiment 1? What were the findings?

3. What were the independent variables and dependent variables used in Experiment 2? What were the findings?

4. What were the conclusions reached in this article?

Once complete, email the assignment the Undergraduate Assistant (utmpsych.utm@utoronto.ca)

You MUST use your 'utoronto' email account.

From the Code of Behaviour on Academic Matters: “It shall be an offence for a student to knowingly: represent as one's own any idea or expression of an idea or work of another in any academic examination or term test or in connection with any other form of academic work, i.e. to commit plagiarism. Wherever in the Code an offence is described as depending on "knowing”, the offence shall likewise be deemed to have been committed if the person ought reasonably to have known.” All students must refer to this website to obtain information on what constitutes plagiarism. http://www.writing.utoronto.ca/advice/using-sources/how-not-to-plagiarize.

Plagiarism will not be tolerated.
