Instructions: Click on the following article and answer the following questions in 2-3 pages (double-spaced):

1. What was the main purpose of the study?
2. What were the main hypotheses regarding the effect of compensation type on risk-taking (i.e., what did the authors predict)?
3. Apart from risk-taking, what other variables did the authors measure (i.e., what other dependent variables were measured)?
4. Did the main results support or refute the main hypotheses?
5. What is one limitation of the study discussed by the authors?

Once complete, email the assignment to the Undergraduate Assistant at utmpsych.utm@utoronto.ca

You MUST use your 'utoronto' email account.

From the Code of Behaviour on Academic Matters: “It shall be an offence for a student to knowingly: represent as one's own any idea or expression of an idea or work of another in any academic examination or term test or in connection with any other form of academic work, i.e. to commit plagiarism. Wherever in the Code an offence is described as depending on “knowing”, the offence shall likewise be deemed to have been committed if the person ought reasonably to have known.” All students must refer to this website to obtain information on what constitutes plagiarism. http://www.writing.utoronto.ca/advice/usingsources/how-not-to-plagiarize.

Plagiarism will not be tolerated.
