Instructions

Click on the following article and answer the following questions in 2-3 pages (double spaced).

1. According to Munhall et al. (2004), how does the intonation pattern of speech help us understand what a speaker says and means?

2. According to Munhall et al. (2004), how does seeing a speaker’s face help us understand what the speaker is saying?

3. Describe the influence of head movement on the perception of speech in noisy backgrounds.

4. Do you think similar head movement effects would be obtained in languages other than Japanese? Why or why not?

Once complete, email the assignment to the Undergraduate Assistant at utmpsycho.utm@utoronto.ca

You MUST use your 'utoronto' email account.

*From the Code of Behaviour on Academic Matters:* “It shall be an offence for a student to knowingly: represent as one's own any idea or expression of an idea or work of another in any academic examination or term test or in connection with any other form of academic work, i.e. to commit plagiarism. Wherever in the Code an offence is described as depending on "knowing", the offence shall likewise be deemed to have been committed if the person ought reasonably to have known.” All students must refer to this website to obtain information on what constitutes plagiarism.
