

Welcome to the Virtual Resource Fair at O-Week 2020!

We will be starting in just a few moments.

Are their jobs for first year students?

How can I get employers to notice me?

MN I've looked into careers by major but this would be the first time I visited the other website resource

Peggy Shkuda

Great! Glad you checked that out. The program plans may be helpful too.

Your major and minor have given you transferable skills which are used in many businesses. I would go into further study only if you know exactly what you want to do. But if you are interested in business, then look for entrylevel jobs in that field. Once you are inside, you can always take more professional courses to upgrade yourself. It is good to get experience to see if you like business.

Manya Nayak

MN I'm also wondering what further study or going into academia would be like but I'm not sure
