Welcome to the Virtual Resource Fair at O-Week 2020!

We will be starting in just a few moments.
Are their jobs for first year students?

How can I get employers to notice me?

CAREER WELLNESS
The ability to cope with personal and career change while pursuing a successful and happy life as you define it.

Mental Wellness
Belong to something bigger than yourself; find ways to make an impact on the world around you.

Financial Wellness
Get to know and like yourself; find ways to build confidence and self-esteem; reach out to those you trust and seek help when needed.

Social Wellness
Manage your money well; take steps to gain financial independence; develop a sense of material security.

Spiritual Wellness
Make new friends and contacts; enjoy fun times with friends and family; accept and offer support.

Physical Wellness
Connect with your higher power; find meaning and important insights in both your joy and sorrows.

Physical Wellness
Take care of your body; improve your physical foundations - sleep, diet and activity.
Prepare to Market Yourself

Think Like An Employer
I've looked into careers by major but this would be the first time I visited the other website resource.

Great! Glad you checked that out. The program plans may be helpful too.

Your major and minor have given you transferrable skills which are used in many businesses. I would go into further study only if you know exactly what you want to do. But if you are interested in business, then look for entry-level jobs in that field. Once you are inside, you can always take more professional courses to upgrade yourself. It is good to get experience to see if you like business.

I'm also wondering what further study or going into academia would be like but I'm not sure.
